

BANK CLEARINGS AND HOT WEATHER

Both Have Been High During the Week With Still Higher Tendencies.

REALTY IS REPORTED "SLOW"

Much Summer Building Notwithstanding the Scarcity of Brick—General Trade Review.

The past week has been a rather quiet one on account of its being mid-summer, with vacations the order of the day. However, in some lines, trade is as brisk as ever. Banking circles are fairly active, with money easy, and interest ranging at about 5 per cent. Deposits are generally larger, considerably larger than a year ago at this time. One explanation of this is that the local demand for money is quite light, and sheep men are paying off their indebtedness which is being deposited in the banking institutions. Bank clearings still keep up, averaging well above the figures of a year ago, though once in a while for the day, the figures will fall below that of the corresponding day of the previous year. Banking conditions in this city are in a healthy condition.

SLOW IN REALTY.

"Slow," is the term applied to the condition of the local real estate market for the week past. However, human nature is hopeful, even buoyant, and the Salt Lake real estate man is sanguine for the future and looks for better things a little later. But this is the time of year when there is not much doing, and speculation is affected, like other things, by the heat. So the real estate men are caring for the smaller things during the hot weather, expecting larger things when it isn't so hot. There are quite a number of transfers, but they are mostly moderate and don't excite much attention. However, a Chicago man named Rudolph Orman has just acquired half a block in the northwest part of the city, the erection of a plant for the manufacture of railway supplies for which it is believed there will be a large local market. Then 63 feet front on South Temple street, between Fourth and Fifth East was sold yesterday for \$100 per foot; and in general it may be said that local realty remains firm with steady tendency to higher prices.

SCARCITY OF BRICK.

The building trades are badly handicapped by the temporary scarcity in brick, as was noted in Thursday's "News," but contractors are pushing ahead as far as they can, and the supply to be obtained, judging from the plans talked about in architects' offices, there will be large and valuable additions to the buildings already existing. A California man proposes to expend \$27,000 on a new rink and auditorium on Richards street, a new manufacturing plant is proposed for railway supplies in the northwest part of the city, the tea gas and coke people are pushing their great plant in the western part of the town, a large addition is to be made to the telephone building, business structures are to go up on west Third South street, and other schemes are being planned. As of the number of new moderately sized houses going up, their name is legion.

DRY GOODS ACTIVITY.

There is activity in wholesale dry goods circles—in the sample rooms where forces of clerks are on the jump preparing sample cases and trunks for the use of druggists who are about to go out on the road, and judging from the looks of the heaps of samples being assorted and distributed there will be no lack of variety of goods for the fall market. The retail trade, the heat of summer is being felt in the usual slackening of steady trade in general lines. There is a demand though for white hosiery to match the white canvas shoes and raincoats now generally affected, and in fact the call for this hosiery is so strong that dealers are finding it difficult to fill orders. The glove trade also continues with unabated pace, that is in the fashionable long gloves, and the demand for the shorter gauntlets and gloves proper separate, the two buttoning together. Lingerie hats are still in demand, and the open work waist remains a constant quarry. The introduction of soda water and candy in the department stores is claimed to be a success. Ladies like to indulge while making other purchases.

SHOE TRADE LIVELY.

The shoe trade is as lively as ever. Prices remain stiff, but that does not appear to make any difference in goods sold. Both the wholesale and the retail trade tell alike the same story. The demand for canvas shoes of various light colors, but principally white, breaks all records. It has been such that the factories have not been able to fill their orders with anything like promptness, and goods have been sent west in large quantities by express. Not only in the cities is the demand particularly heavy, but out in the country it has been steady and strong. The farmers of the middle west have paid off their farm mortgages and laid out money in the bank so that both men and women are able to afford city fashions. One shoe firm in this city alone has sold this season 2,000 pairs of white canvas shoes. Dealers feel that the recent beef exposures will reduce so the consumption of meats as to seriously affect the hide market, and by furthering the scarcity in hides force up further the prices of leather.

WITH THE CLOTHING MEN.

The clothing trade remains firm in all of its lines. Straw hats are in strong demand, and men's wear is selling steadily. There is quite a call for soft collars which are considered just the thing for the hot weather, and the demand for light waist, four in hand neckties is considered unprecedented.

HARDWARE BOOMING.

The hardware trade is booming. Local dealers report that it is impossible to keep up their orders in any one line of goods. The demand is incessant, it seems to come from everywhere. Builders' hardware, shelf hardware, mining machinery, implements of all kinds, tinware, harnesses, saddlery, everything is on the go. One firm says that of one kind of harnesses alone it is selling at the rate of 150 sets per year. Another reports that 100,000 worth of business could be done in Salt Lake in the harness and saddlery trade in one year. There does not seem to be any limit to the hardware trade in all directions through the state and into Nevada. The crockery and glassware trades too report prosperous times. There is a large call for articles in these lines from house-

MIDSUMMER

Still it is Much in Excess of Business in Earlier Years.

GETTING READY FOR THE FALL

Confidence Characterizes the Market—Railway Earnings Larger Than Last Year.

New York, July 12.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say:

Midsummer conditions are more in evidence than at any time previous to this season, although trade continues far in excess of earlier years and preparations for fall and winter are unabated. Confidence is the commercial sentiment, induced by exceptionally favorable crop reports and the absence of any distinctly adverse factor. Railroad earnings in June were 10.8 per cent larger than in 1899, and foreign commerce at this port for the last week shows an increase of \$1,899,887 in exports and a loss of \$794,622 in imports, as compared with last year's figures. Temporary ease in call money did not weaken time loans which reflect the expectation of heavy shipments of currency to the interior for crop moving in the near future.

Many iron furnaces and steel mills have resumed after a brief season of idleness for repairs, inventories and settlements of wage scales, and the production is more very heavy.

Textile manufacturing conditions are not materially altered. Failures this week number 202 in the United States against 223 last year, and 21 in Canada, compared with 29 a year ago.

SUMMER SCHOOL LECTURES.

Sara Cone Bryant will be at the University Next Week.

Sara Cone Bryant, the noted author and educator of Boston, will arrive in this city on Monday morning, and while here will deliver a series of lectures at the Amusement building of the state university under the auspices of the summer school. These lectures, like all others under the school management, will be free to the public and a cordial invitation is extended to all. The lecturer will speak on Monday afternoon at 3 o'clock, on how to tell stories and how to read aloud. The lectures are on the general subject of literature to the young in story telling and reading, and to the interest will undoubtedly be of great interest.

BUILDING PERMITS.

Building permits issued last two weeks:

Mrs. Elizabeth Scott, rear 750 South West Temple, \$1,000.
William Harris, 500 and 552 West Second Street, \$1,800.
Robert Howard, rear 125 East Fourth Street, \$200.
Mrs. East, 121 and 123 East Chesapeake, 2 West Second Street, \$2,500.
Mrs. Hannah Ralls, 900 South First West, \$1,000.
C. R. Anderson, rear S.E. corner Sixth and Third, south street, \$750.
Fowler & Smith, rear of 130 West South street, \$1,000.
W. N. Williams, rear 21 North West Temple street, \$300.
Bathwell & McCannaghay, Eighth North between Second and Third West streets, \$200.
G. Benson, Eighth South between Fourth and Fifth East streets, \$300.
Ms. Sarah M. Baldwin, East Sixth South street, \$150.
John Bauer, 108 Garfield Ave., \$100.
Frank Smith, 300 South East street, \$200.
Mrs. Selma Lindgren, Bagley and Young streets, \$100.
Theresa Jost, 100 East Third and West Second South street, \$300.
Mrs. Charlotte Jones, Fifth West between Third and Fourth North streets, \$150.
Mrs. S. E. Holmes, is North State street, \$800.
Mrs. Emily B. Stoddard, Third South and Tenth East streets, \$150.
Mrs. Emily B. Stanley, Third South and Tenth East streets, \$800.
James Yeates, 321 North First West street, \$200.
Mrs. Mary Jones, 464 North Fifth West street, \$1,500.
Asper, Neill & Co., 404 Fourth street, \$150.
J. N. Elmore, 444 South Third East street, \$200.
J. J. Day, rear of 32 and 34 East Third South street, \$500.
David R. Lyon, corner Ninth and E street, \$400.

REAL ESTATE TRANSFERS.

TODAY.

Copper King Mining company to W. McCall, Jr., quit-claim deed, Basin, lots, etc., Big Cottonwood, \$200.
Estate Rachel W. Tanner to F. C. Howe, quit-claim deed, part section 18, township 2 south, range 1 east, \$235.

RECLAMATION DULL

Secretary of the Interior Has Made a Substantial Increase to Fund.

TOTAL REACHES \$3,040,000.

Work on the Various Irrigation Projects is Being Rapidly Extended.

(Special to the "News.")

Washington, D. C., July 14.—The people of Idaho are to be congratulated on the substantial increase made by the secretary of the interior to the reclamation fund available in that state. There has already been set aside \$2,600,000, two-thirds of which was devoted to the Minidoka project, the remainder to the Payette-Holse project and the work on each of these is being rapidly extended. It was found necessary to increase the allotment to the secretary of the interior of that of the Minidoka project at \$1,533,000 and the Payette-Holse at \$1,490,000, making the total for Idaho of \$3,040,000.

CHICAGO YACHT CLUB'S ANNUAL RACE TO MACKINAC

Chicago, July 14.—With the boom of the first starting gun reverberating across Van Buren street gap at 2 o'clock this afternoon the Chicago Yacht Club's annual race to Mackinac will be on. Seventeen fine, stanch craft are expected to start on the 200-mile run and under favorable weather conditions the contest will be the closest and most interesting since the establishment of the annual event. Commodore Baum's steel yawl Arcadia will be the flagship of the squadron, and his crew is among those praying for plenty of wind. The fine Toledo yawl Hussar II is another heavy weather craft.

Thief among those boats to which light weather will have its attractions are the big sloops Van Nenna, Vincendor and Neva. However, these boats can stand a mighty blow as well.

In connection with the race of the sailing craft six of the most seaworthy motor boats in the harbor will enter upon the run for a special trophy offered by the Chicago Yacht club. The power boats expected to start are Nantua Erie, Quicksort, Sackajawa, Kit Chigammi and Eleanor III.

PROHIBITION IN KANSAS.

Bar Fixtures Burned and Whisky Spilled in the Streets.

Independence, Kan., July 14.—The bar fixtures of five Coffeyville and one Cherokee joints, which recently served jail sentences for violating the prohibition law, were burned here today by order of Judge Flannery of the local court. Forty kegs of brandy and a quantity of whisky were also spilled and 2,000 bottles of beer were destroyed.

IN THE SCIENTIFIC WORLD.

Collections of voices are being made for various purposes. The phonograms of the British museum are designed to preserve for future generations the voices of ancient people of our time; but the Vienna Academy of Sciences is going further, and will make phonograms of languages and dialects for the comparative study of languages. Already its collection includes popular songs of egyptians and Arabians, favorite airs of old Indian tribes, hymns of negroes and Malays, and so on. It is sending out special voice-hunting expeditions every year, and its agents are now scouring Australia, Roumania, Austria, and other localities, its latest plan is to photograph the voices of animals, for scientific study.

For cutting metals by a jet of oxygen, the Jottrand apparatus consists essentially of a tube with two nozzles, one facing in blowpipes, moved along a guide at the rate of about 6 inches per minute. One blowpipe discharges an oxyhydrogen flame, which heats the metal to a dark red along the cutting line. A jet of pure oxygen from the second blowpipe enters into combustion with the heated metal, producing a clear channel, like a saw-cut, about an eighth of an inch wide, the remainder of the metal being unaffected.

For 35 years Camille Flammarion has kept a record of the dates of appearance of leaves and insects on the chestnut trees near the Paris observatory. Comparing these dates with the sunspot cycle, he finds a remarkable coincidence, leaves and flowers being earliest at sunspot maxima.

Considering self-destruction and the war of the sexes, the bird which has the suicides at Brussels up to July and August, the minimum usually being in December.

The new iron process of Boschhardt, a German engineer, converts scrap wrought iron into malleable iron or steel at one operation. It is carried out by means of electrical furnace, with the introduction of various substances into the molten metal during smelting and casting. The process is claimed to have all the qualities of the best malleable iron, with great strength and ductility. The finest tool steel can be produced by the same process at one melting. The process makes it possible to cast various articles and parts of machinery directly from the ladle, thus saving the cost of the ordinary shop process. The process is a few hours instead of the wait of one to three weeks for converting cast iron articles into malleable iron. Furnaces are already in operation in Germany, Holland, France and Hungary.

The old rain gauge or pluviometer, showed only the total rainfall in a given time. The new gauge, however, shows variations in rate, and with such an apparatus, Gellenkamp, a German meteorologist, has obtained diagrams within the last ten years that prove the course of an ordinary shower to be a rapid series of successive maxima and minima of intensity. In rain of some extent, water-charged waves of air seem to follow each other at short intervals. In more local showers the first condensation sets free heat that may evaporate part of the following drops, repetitions of this process perhaps giving many oscillations in the intensity of the rain.

The need of more scientific running of grindstones is pointed out by a Sheffield factory inspector, no proper speed being now recognized. Two factory managers offered by 1200 feet per minute in estimates of the safety limit. In file grinding, speeds vary from 2,500 to 4,500 feet per minute, and in seven breakages of the periphery speeds ranged from 2,540 to 4,250 feet. Soaking in water over night may reduce the tensile strength of a stone from 80 to 20 per cent.

Injections of air under the skin as a treatment for gonorrhea, syphilis and scabies were suggested in France two or three years ago. The suggestion has been acted upon lately by Dr. Mongour and others, who pump air beneath the skin with a special syringe having a valve somewhat like that of a bicycle pump. The quantity of air injected varies a general rule being to stop pumping when the pain ceases. Excellent results are reported, and an important advantage is the absence of harmful after-effects. How the treatment acts is uncertain, one suggestion being that injection relieves neuritic pain by elongating the slender nerve ramifications along the muscles.

Pædiometry, the weighing of children, is the latest method of measuring growth. By an ingenious mechanism he records simultaneously both increase of height and of weight.

PRESIDENT WILL NOT BE CANDIDATE

Secy. Loeb Says Statement That He Would Not be Irrevocable.

WILLIAMS THINKS OTHERWISE

Thinks He is Planning so That He Will Be Forced to Make Race.

New York, July 14.—Before sailing today for London where he goes as a delegate to the international parliamentary congress, Representative John Sharp Williams, minority leader in that house, gave it as his opinion that President Roosevelt would consent to run again. "I think," said Mr. Williams, "that the president is planning it so that he will be forced to make the race. The president rather reminds me of the old lady of Saragossa, who hung about, asking when the gentlemen were going to begin kissing, as she wanted to be there."

The minority leader declared that "W. J. Bryan is the logical candidate of the Democratic party."

Mr. Williams did not say whether he intended to meet Mr. Bryan in Europe. He declared a report that he had refused to serve on the reception committee, which will welcome Bryan in New York next month.

WILL NOT BE CANDIDATE.

Oyster Bay, July 14.—When the interview of John Sharp Williams was shown to Mr. Loeb, secretary to the president, today, Mr. Loeb said: "The president meant exactly what he said on the night of his election, that he would not be a candidate again for the office, that statement is irrevocable."

PROBATE AND GUARDIANSHIP NOTICES.

Consult County Clerk or respective agencies for further information.

IN THE DISTRICT COURT, Probate Division, in and for Salt Lake County, State of Utah, in the matter of the estate of Stanley B. Miner, deceased. Notice.—The petition of Truth A. Miner, executrix of the estate of Stanley B. Miner, deceased, for confirmation of the sale of the following described real estate of the decedent, to-wit:

Beginning at the northeast corner of lot 4, block 15, plat 11, Salt Lake City and survey, and running thence east 7 rods, thence south 50 feet, thence east 7 rods, thence north 50 feet to the place of beginning for the sum of \$2,000. And upon the following terms, to-wit: Cash, \$1,000, balance one year from July 14, 1900, at 6 per cent interest, payable in semi-annual return of sale, filed in this court has been set for hearing on Saturday, the 25th day of July, A. D. 1900, at 10 o'clock a. m., at the County Court House, in the Court Room of said Court, in Salt Lake City, Salt Lake County, Utah.

Witness the Clerk of said Court with the seal thereof affixed this 12th day of July, A. D. 1900.

(Seal) J. U. ELDRIDGE, Jr., Clerk.
By W. A. D. 1900, at 10 o'clock a. m., at the County Court House, in the Court Room of said Court, in Salt Lake City, Salt Lake County, Utah.

Frisk, Edwards & Smith, Attorneys for Estate.

NOTICE TO CONTRACTORS.

Notice is hereby given that sealed bids will be received by the undersigned up to 12 m. on July 15, 1900, for the materials and labor necessary for the erection of a new school house to be erected between Main Street and West Temple Street on a street running from east to west about one city block south of Ninth South Street, for the Salt Lake City Board of Education, according to plans, specifications and drawings, which are on file in the office of Richard Kietting, architect, in the Hooper & Eldridge Block, Salt Lake City, Utah, and all bids must be accompanied by a check or cash for the amount of the bid, which will be held by the undersigned until the bid is accepted and the bidder does not enter into the contract within thirty days after its acceptance, for the faithful execution of the contract and bond hereinafter specified.

A bond must be furnished for one-half of the bid and good and sufficient securities, all satisfactory to the undersigned. The bids are to be for the following work and no subdivision will be considered:

First: For the foundations of the building to first floor level, comprising excavation, concrete, cement and masonry work only, including footings resting on concrete piles, piling included.

Second: For the foundations of the building up to first floor level, comprising excavation, concrete, cement and masonry work only, including footings resting on concrete piles, piling included.

Third: For the building complete, excluding painting, plumbing, heating, plumbing and electric wiring.

Fourth: For the heating.

Fifth: For the plumbing.

The undersigned reserves the right to reject any and all bids.

BOARD OF EDUCATION.
